Re: On-Site Soil Interim Remedial Measures Report

Dear Mr. Berdahl:

EPA has completed its review of the On-Site Soil Interim Remedial Measures Report dated March 1, 1996. This report describes the soil removal events that took place in the Production Area and SWMUs 5&6 during the June through September, 1995 period. The interim remedial measures have been completed to the satisfaction of EPA.

As you are aware, this removal action is considered an interim measure. Any final decisions or approvals regarding these areas will be made after the RFI and CMS reports are reviewed by EPA.

If you have any questions, I can be reached at (617) 573-9643.

Sincerely,

Frank Battaglia, Project Manager
